

# ITC-PRESS

Interlaken ServoPress 225 (SP225)

Double acting hydraulic press for material characterization, forming tests and component testing of ductile metal sheets

## OUR SERVICES

- Swift test (Cupping test)
- Bulge-test (Determination of flow curves)
- Nakajima-tests (forming limit curves)
- 3-point bending test
- Axial crushing

## TECHNICAL DATA

- **manufacturer:** Interlaken
- **table:**  
max. force: 1000 kN  
max. speed: 112 mm/s
- **stamping:**  
max. punch force: 1000 kN  
max. speed: 112 mm/s

As a subsidiary of AIT **LKR Leichtmetallkompetenzzentrum Ranshofen GmbH** is pursuing a holistic research and development approach to lightweight construction in the vehicle sector - from new metal alloys and process technology to material-related structural design.

This makes LKR a powerful and independent partner for your development projects.
